Re: South Dayton Landfill
1975 Springboro Road
Dayton, Ohio

Dear Mr. Grillet:

A recent interpretation by the Ohio Department of Health indicates that all licensed solid waste disposal sites must have detailed engineering plans.

From E.W. Arnold, M.D., Director, Ohio Department of Health:

"Where no detailed engineering plans for the waste disposal site have been approved by the Ohio Department of Health an "Operational Procedure Plan" shall be completed immediately for each disposal site. A copy of this "Operational Procedure Plan" shall be on file in the local health department office.

This "Operational Procedure Plan" is to be used on an interim basis until detailed engineering plans have been approved or the operation is phased out."

Therefore, you will find enclosed a copy of the "Operational Procedure Plan" form to fill out and submit for approval. If and when approved, a copy will be made and returned to you. Complete Engineering plans must be submitted to this office by August 31, 1969.

The Ohio Revised Code, Sections 3734.01 to 3734.11 inclusive, and the regulations HE-24-01 to HE-24-12 inclusive of the Ohio Sanitary Code quite clearly prohibit burning on any landfill site without a permit. No permits will be issued for burning on landfill sites as defined by the approved engineering plans.

If you desire to burn material that is not considered to be solid waste (see Section 3734.01 (E) explanations - Interpretive Guide for Solid Waste Disposal Laws and Regulations) the following conditions should be met:

1. Locate a site where burning will not present a nuisance or a public health hazard (a licensed solid waste disposal site cannot be used).
2. Obtain approval of authorized zoning board.
3. Obtain a burning permit from local fire officials.
